Good afternoon,

I previously submitted an email but I've been notified it wasn't received.

I'm emailing to voice my request that city administration work toward making the north east St. Albert site feasible. I am a mom with two children currently living in Erin Ridge North. I moved to this part of town and built a home so that my children would be in a community with other children and with access to quality education - that need has been met by the building of Lois E Hole school -- but my children are now left with no reasonable proximity to secondary school options. We are in desperate need of a secondary school in this part of town. There are currently 3 newer elementary/elementary - middle schools that service this area with no secondary school support. There has been a lot of focus on Erin Ridge North being a family friend neighborhood and yet we do not have the resources to sustain our family throughout my children's development into adolescence. There is a site available - please build on this North East site.

Thank you for your consideration,

Carley
