

Feedback from Residents

Resident 1:

Parkland Designation – I favor the Municipal Reserve land exchange adjacent to the proposed R1 zoning.

Resident 2:

The only area that must be retained is the green space presently developed along Coalmine Trail east of Ebony. This already developed area is there because of the original planning approvals, and is there not only to provide additional trail system for the area, but also to provide a buffer between those residential areas that were already in place prior to the closure of Coal Mine Rd.
